

Briefing for Care Home managers regarding GP contract and administration of flu vaccinations 9th September 2020

Introduction

The purpose of this briefing is to provide Care Home Managers with an update regarding:

- 1) GP practice alignment to Care Homes
- 2) Administration of flu vaccinations for people living in Care Homes.

Background

A briefing was circulated in July 2020 to all Care Home managers sharing details of the new 5 year GP contract and the requirement for groups of GP practices to form Primary Care Networks (PCNs) to work more closely to provide services to people living in communities of 30-60,000 populations.

The main focus of the previous briefing was around the Enhanced Health in Care Homes (EHCH) service specification that the PCNs are required to deliver and how this will impact positively in people living in Care Homes.

- 1) Update regarding EHCH

The PCNs and GP practices that operate within them are working hard to align a number of Care Homes to GP practices. As from October 2020 there is a requirement for PCNs to work with community providers to support weekly home rounds in their aligned Care Homes and establish a multi-disciplinary team to develop and refresh personalised care and support plans for people living in Care Homes.

Please see appendix 1 for details of the PCNs and which Care Homes they are going to be aligned to, this was shared previously but now has the details of the clinical lead for each Care Home.

Your ongoing support with this process is really valued as is key in encouraging and supporting the people living in your Care Homes to register with a new practice in the PCN if required. This has the potential to really improve relationships between Care Homes, GP practices, community services and wider services which will improve the care and support that can be offered to people living in Care Homes and have a positive impact on their health and wellbeing.

Some people may prefer not to move to an alternate practice and it must be stressed that resident choice is paramount and nobody can be made to change GP practice if they don't want to but it is hoped that the majority of people will be supportive of this change because of the benefits it will bring to them, their families and the Care Home team.

- 2) Administration of flu vaccinations

A lot of work is happening across the system regarding flu vaccination administration to ensure that all vulnerable cohorts of people get a vaccination.

One element relates to a specific piece of work to establish processes for the safe administration of flu vaccinations for people living in Care Homes. As a result of this work a set of key principles have been agreed as detailed below:

- ✚ Partners to work collaboratively to do what is best for people who are housebound and living in Care Homes
- ✚ Adopt a safe, fair and efficient process that works for all parties
- ✚ Minimise duplication of effort
- ✚ Reduce the need for unnecessary visits into people's home and Care Homes by health professionals
- ✚ Recognise issues around demand and capacity for all parties involves
- ✚ Try to vaccinate all residents in Care Homes during one visit.

Each PCN Clinical Director has been encouraged to ask the GP practices in their PCN to have a conversation with the Care Homes that are aligned to understand the Care Homes preference for staff and people living in the Care Home to receive the flu vaccination as there are a range of options that could be delivered as below. The main aim is to ensure that all people living in Care Homes receive a flu vaccination in a safe, efficient and timely manner.

There are three potential options:

- GP practice staff immunise people living in the Care Home and Care Home staff attend their own GP practice or a community pharmacy to receive the vaccination
- The Care Home has already or will make arrangements with their local Community Pharmacy to immunise all people living in the Care Homes and the staff.
- Community Nursing Service (CNS) immunise people living in the Care Home and Care Home staff attend their own GP practice or a community pharmacy to receive the vaccination.
