RESPOND CARE HOME

Do you work in a nursing or residential home based in England that supports the health and well-being of older adults?

We would like care home staff to complete the survey about how acute deterioration (rapid onset of severe illness) is recognised and managed in residents. We want to learn about your experiences of providing care for acutely unwell residents and what tools are currently being used in practice.

Please help us to better understand this area of care by completing a short survey. The survey is completely anonymous and takes 5-10 minutes to complete.

Scan the QR code or follow the link:

<https://nottingham.onlinesurveys.ac.uk/respond-care-home-2-copy>

An e-voucher will be offered to all participants as a thank you.

For further information please contact the lead researcher: Sevim Hodge – ntxsyh@nottingham.ac.uk
